List of Figures

List of Tables

Figure A1: Summary of Coefficient Estimates — Approved, Time +2, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

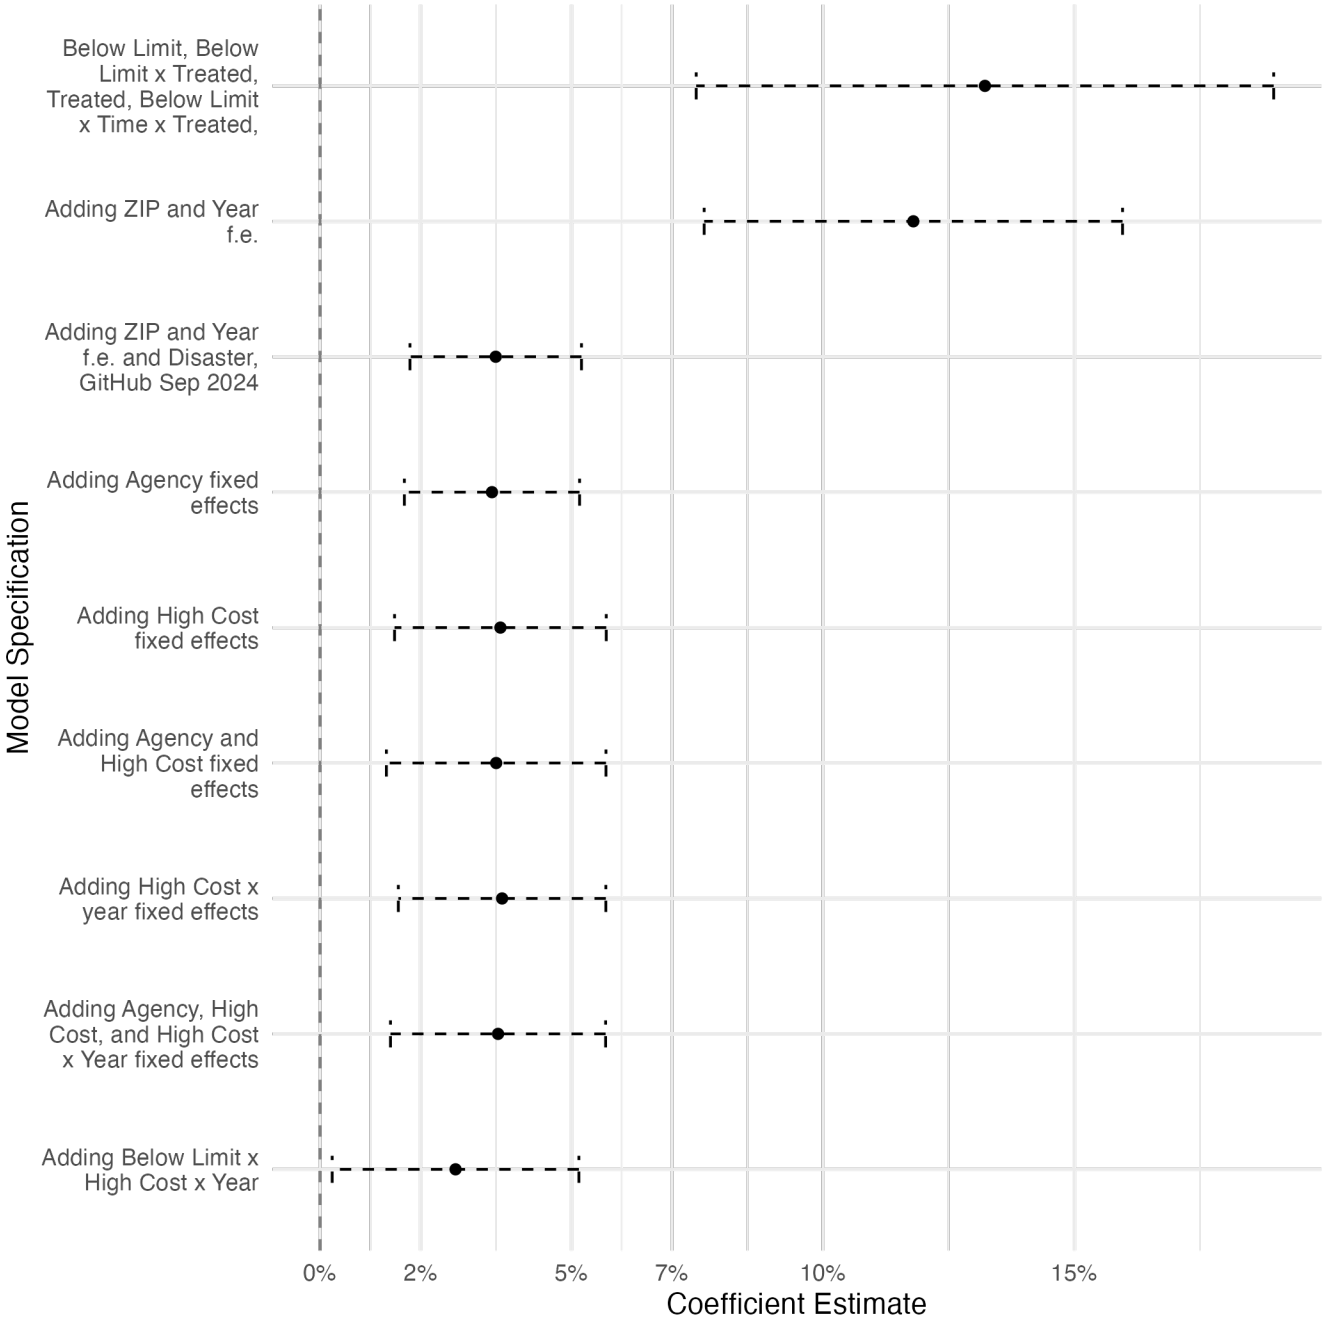

Figure A2: Summary of Coefficient Estimates — Approved, Time +2, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

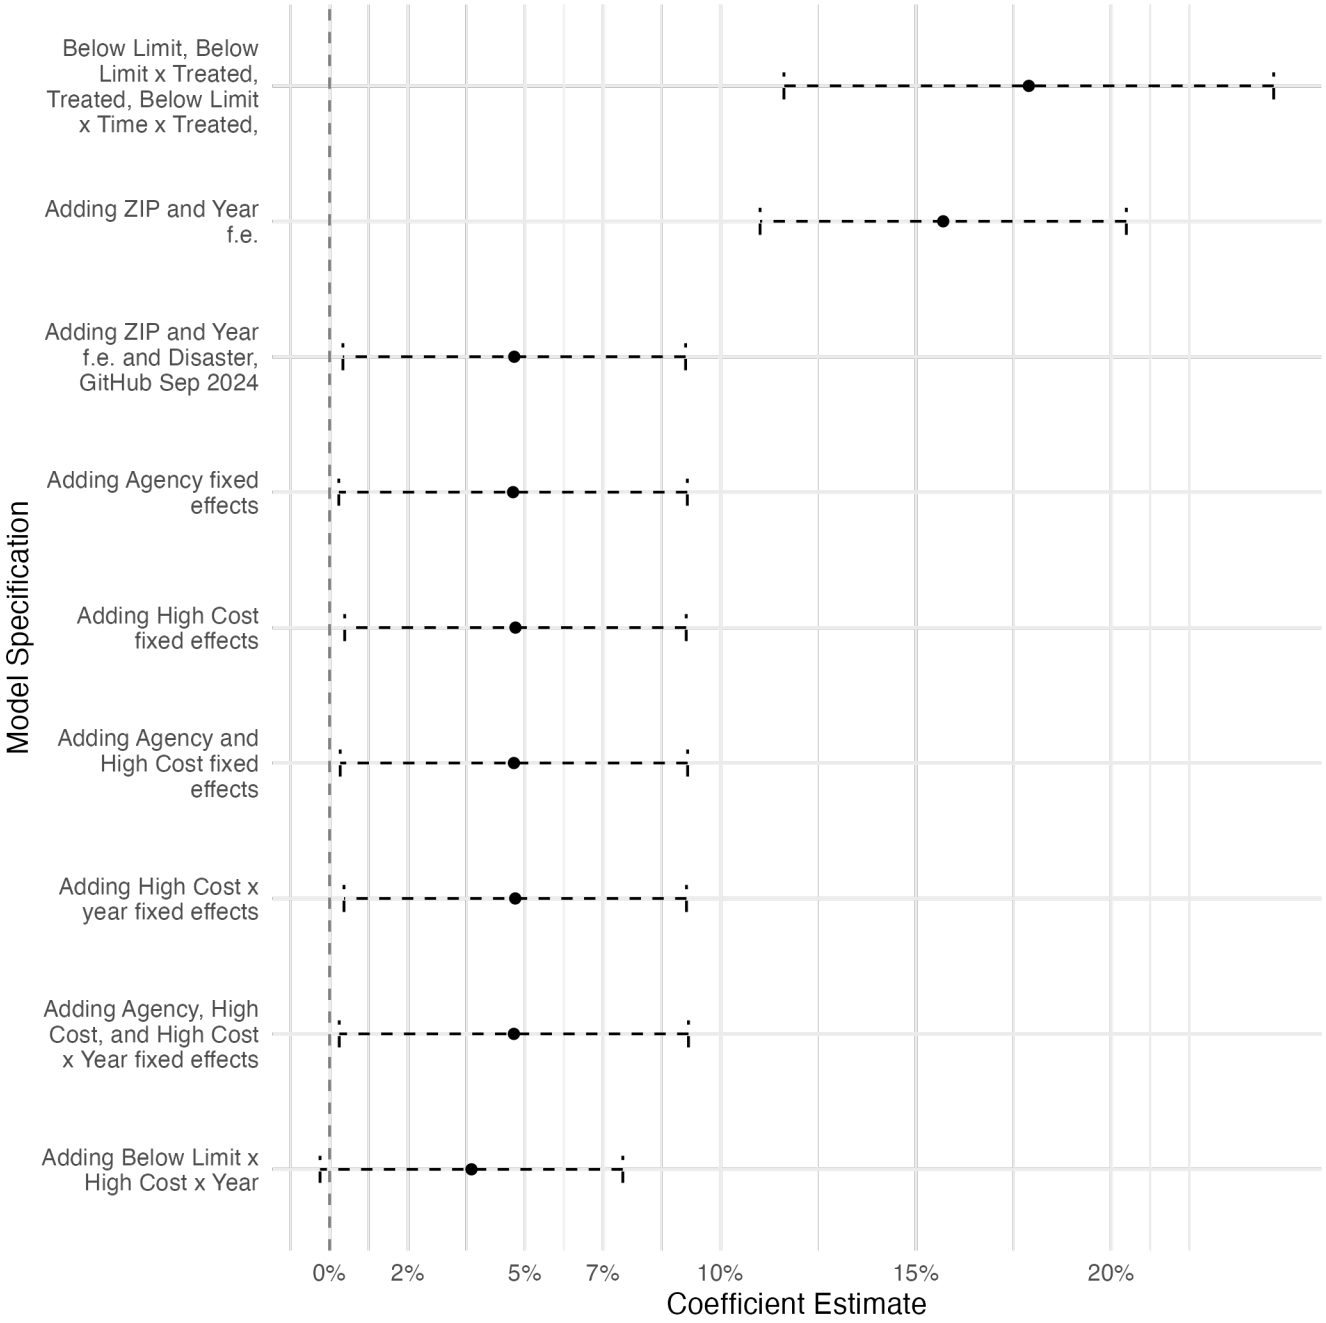

Figure A3: Summary of Coefficient Estimates — Approved, Time +3, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

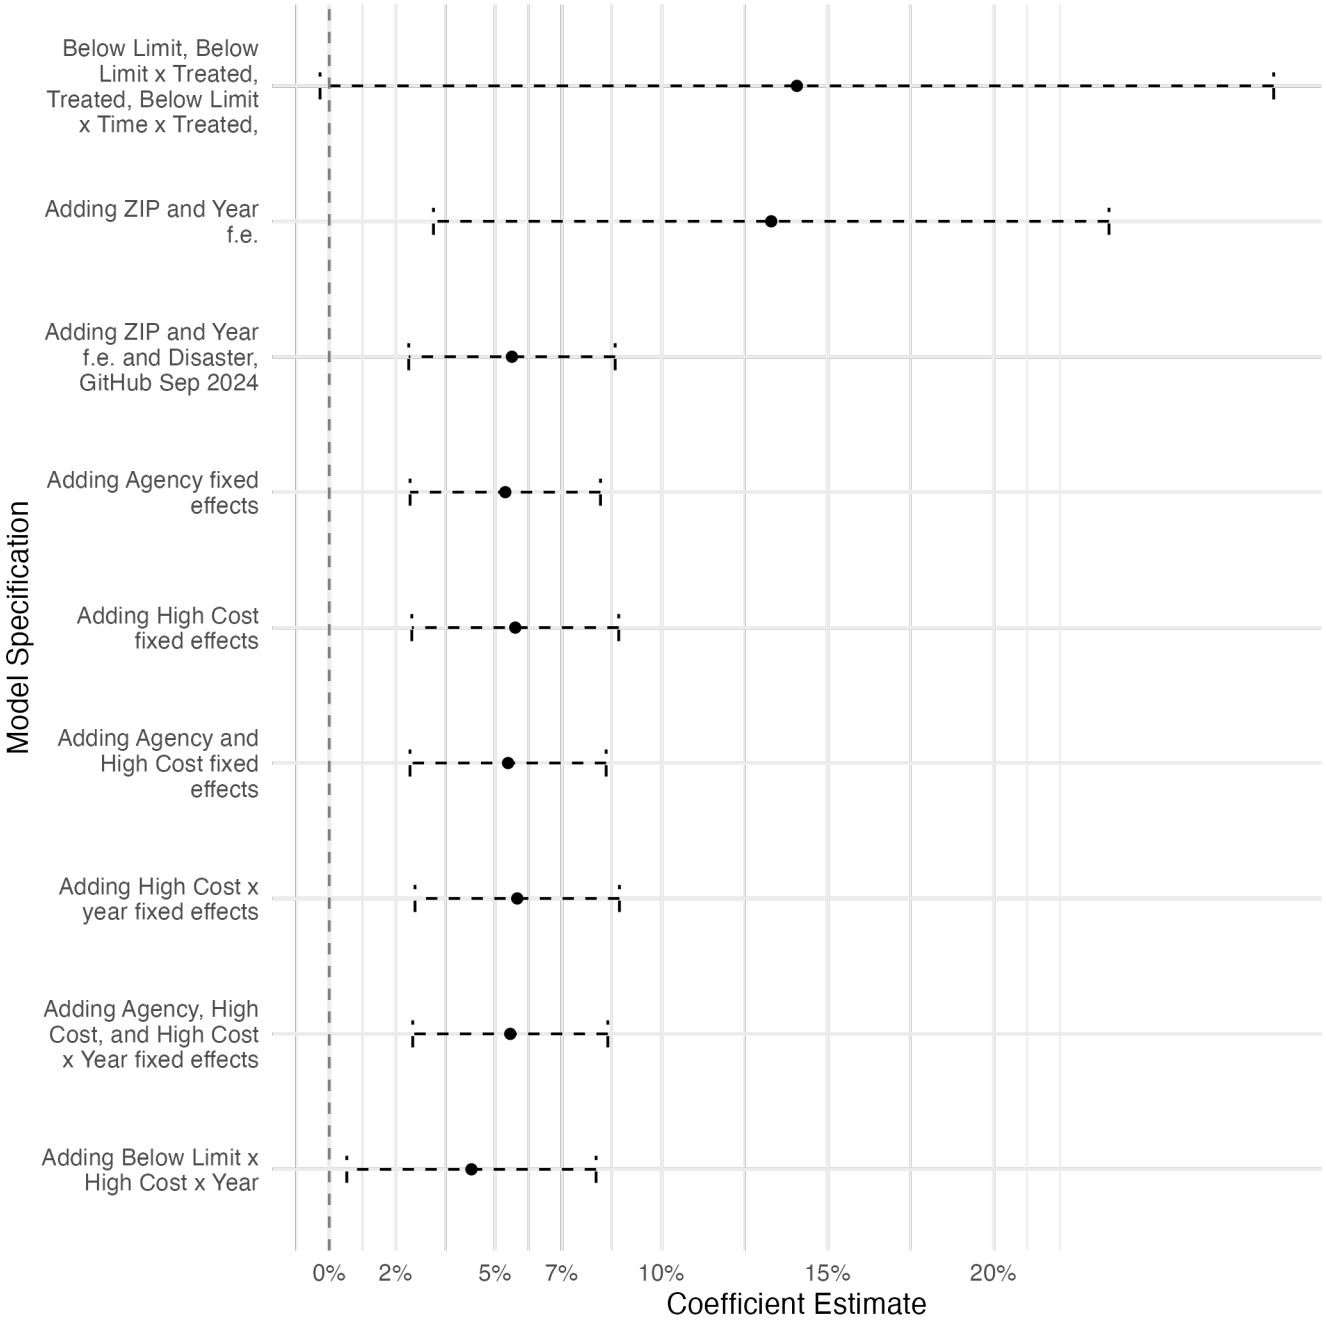

Figure A4: Summary of Coefficient Estimates — Approved, Time +3, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

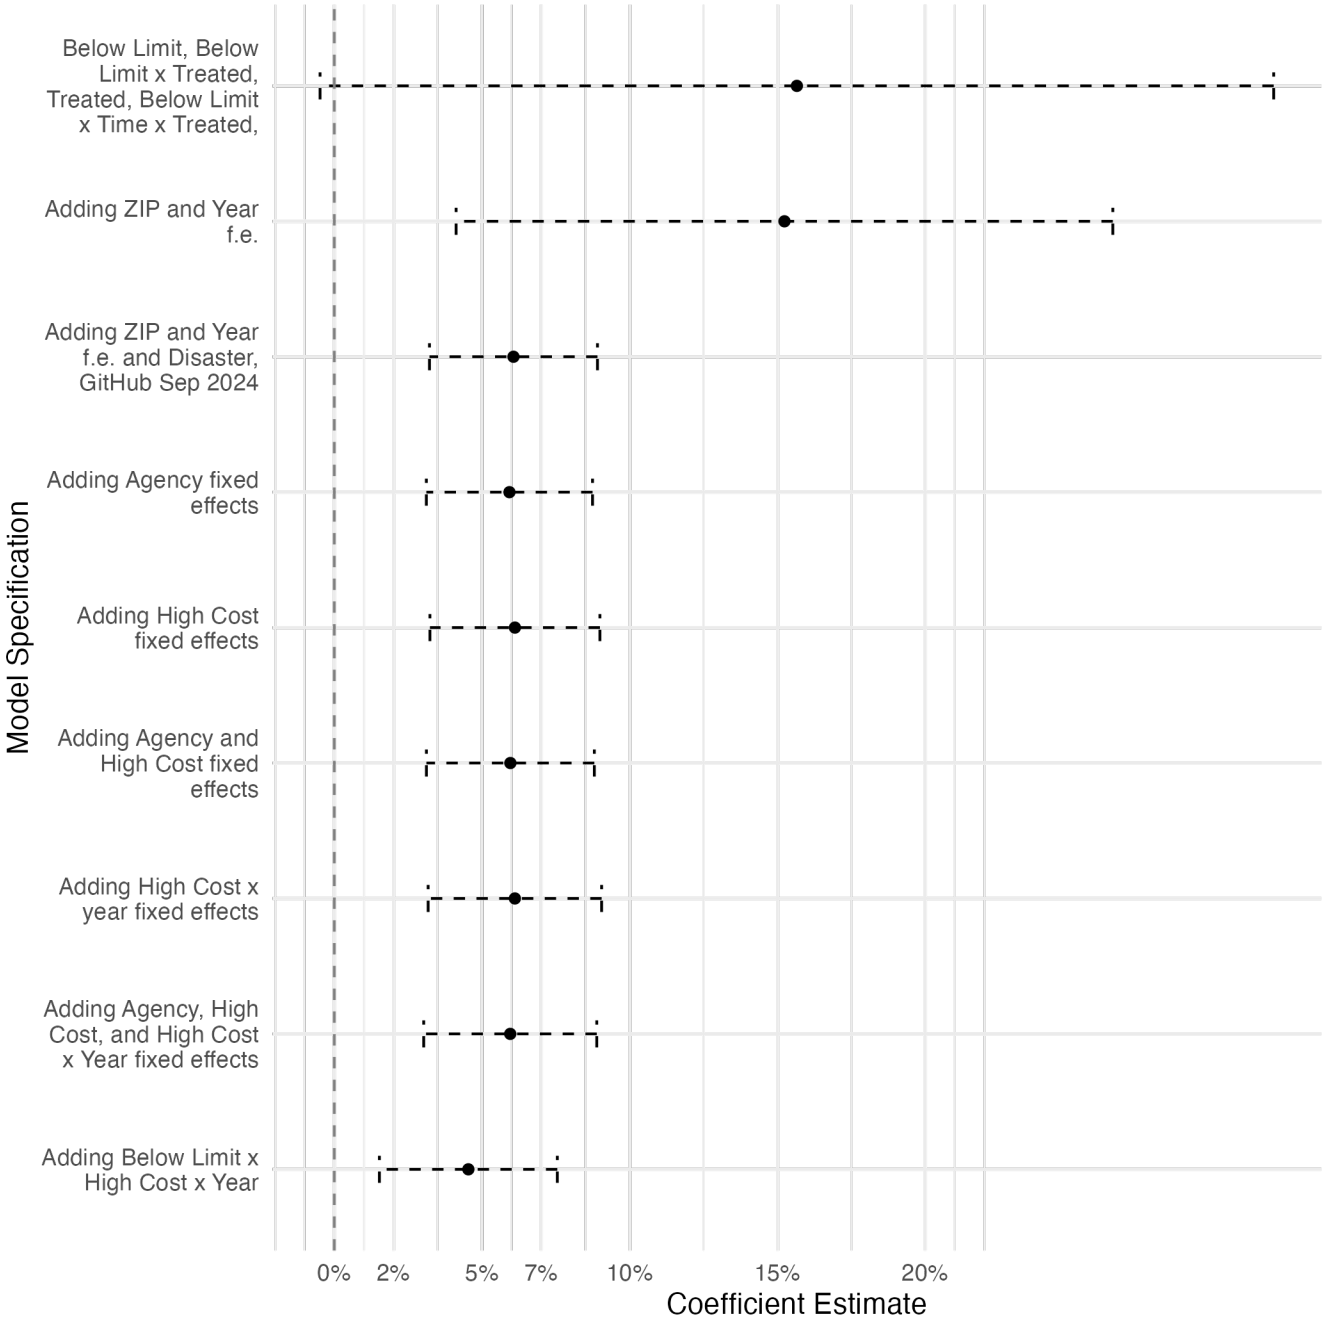

Figure A5: Summary of Coefficient Estimates — Originated, Time +2, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

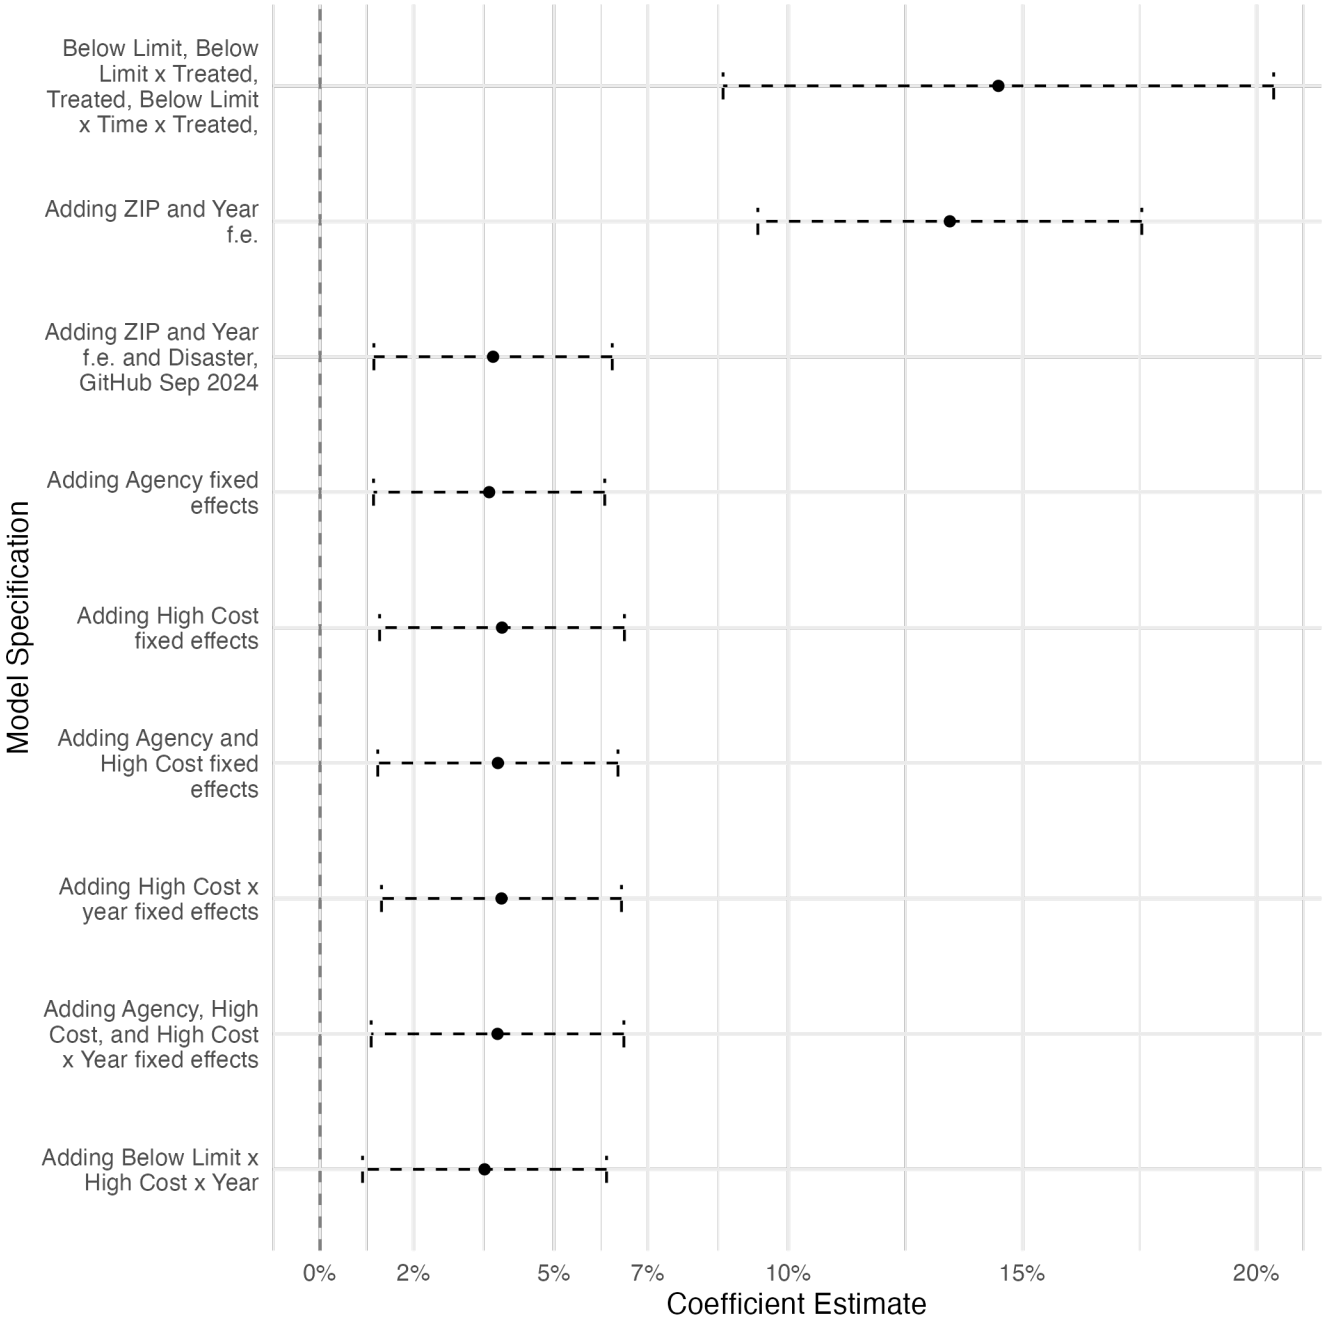

Figure A6: Summary of Coefficient Estimates — Originated, Time +2, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

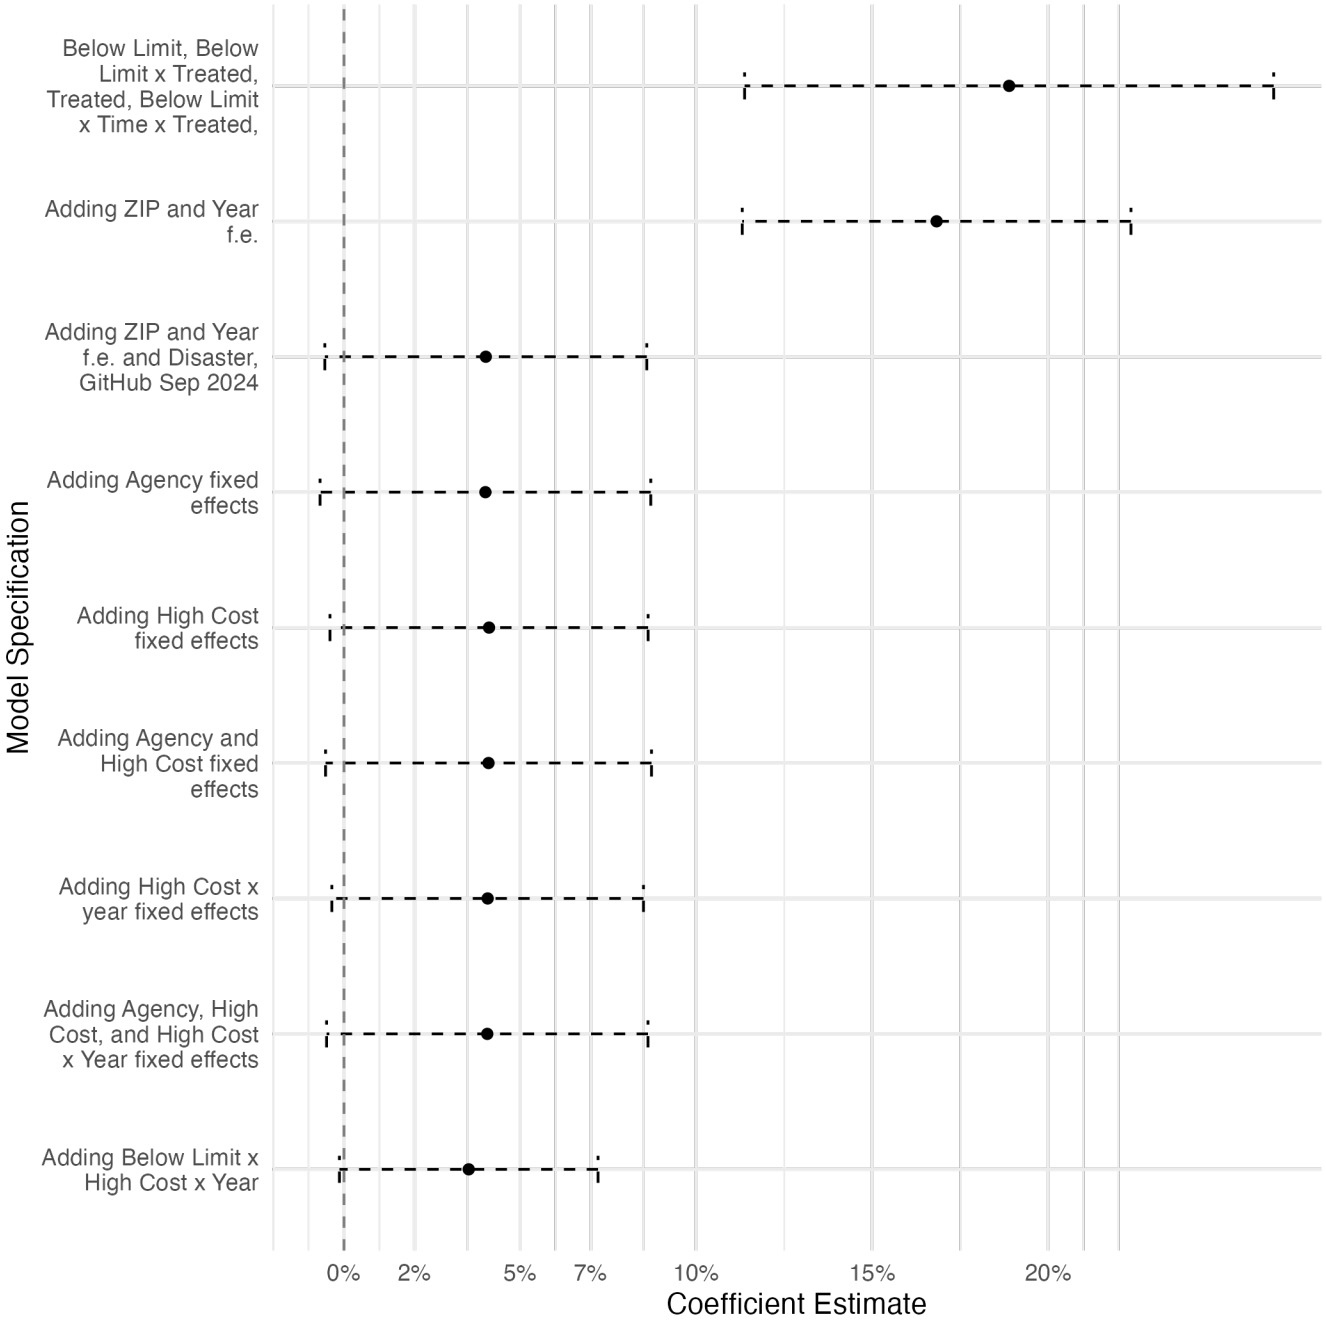

Figure A7: Summary of Coefficient Estimates — Originated, Time +3, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

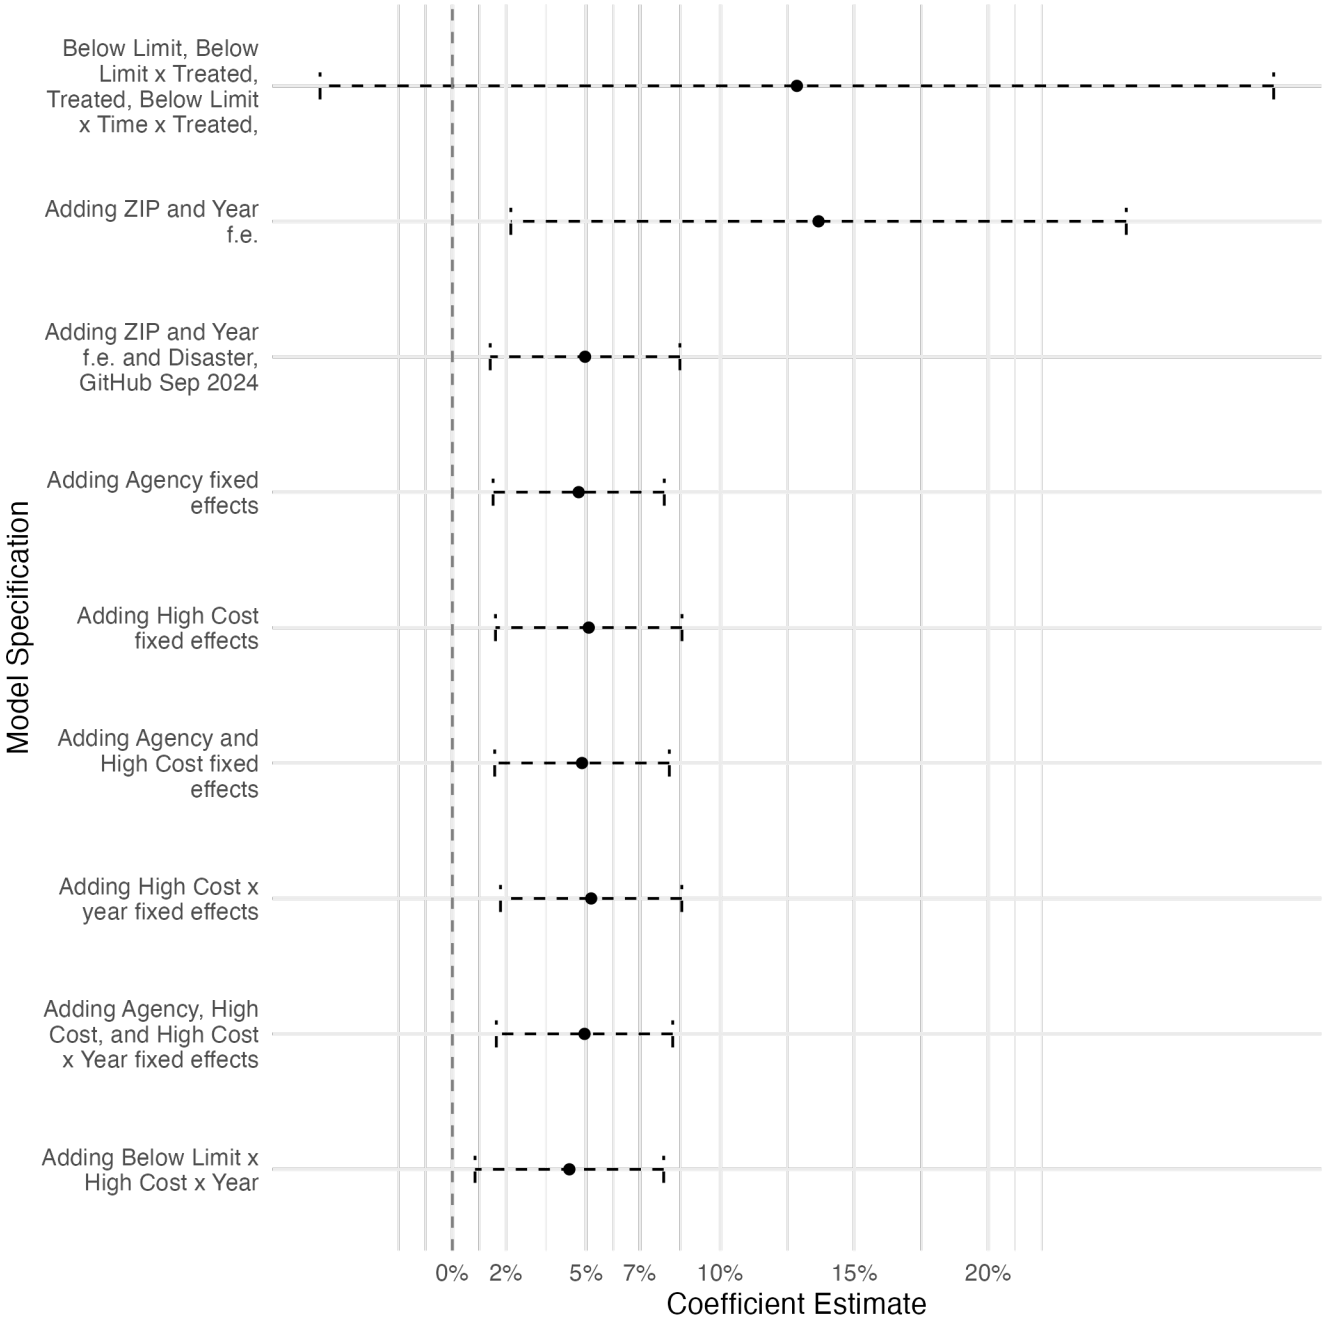

Figure A8: Summary of Coefficient Estimates — Originated, Time +3, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

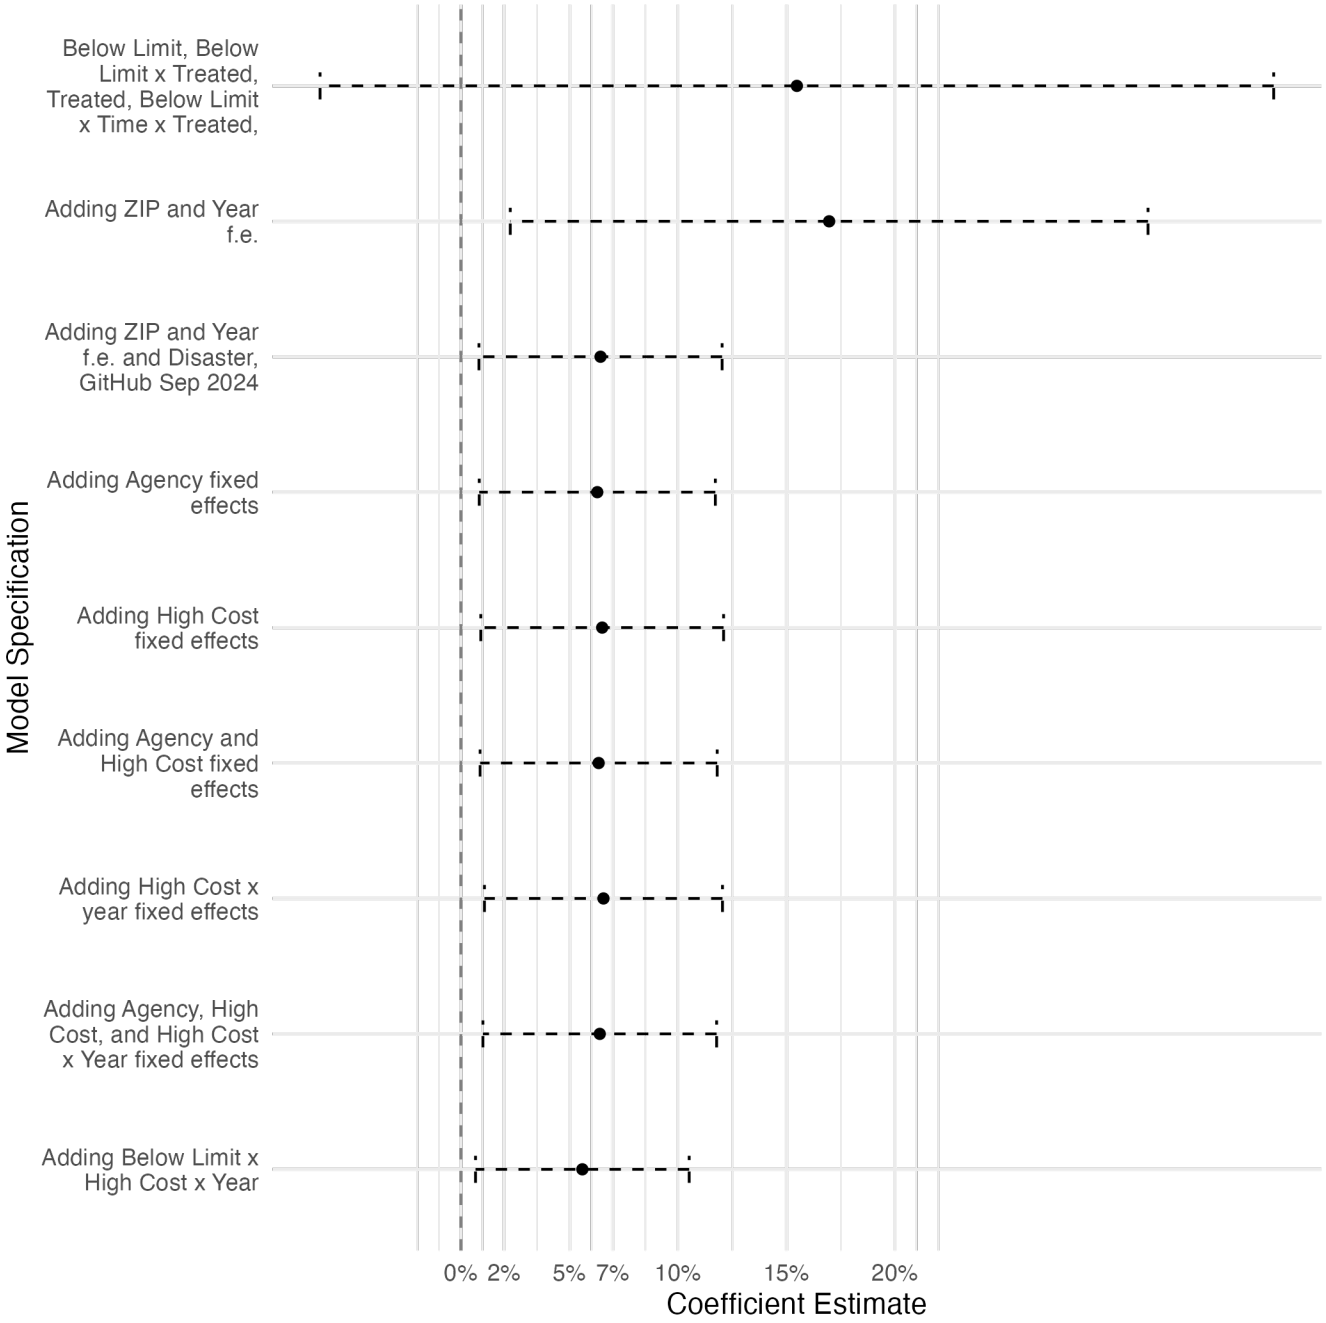

Figure A9: Summary of Coefficient Estimates — Securitized cond. on Origination, Time +3, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

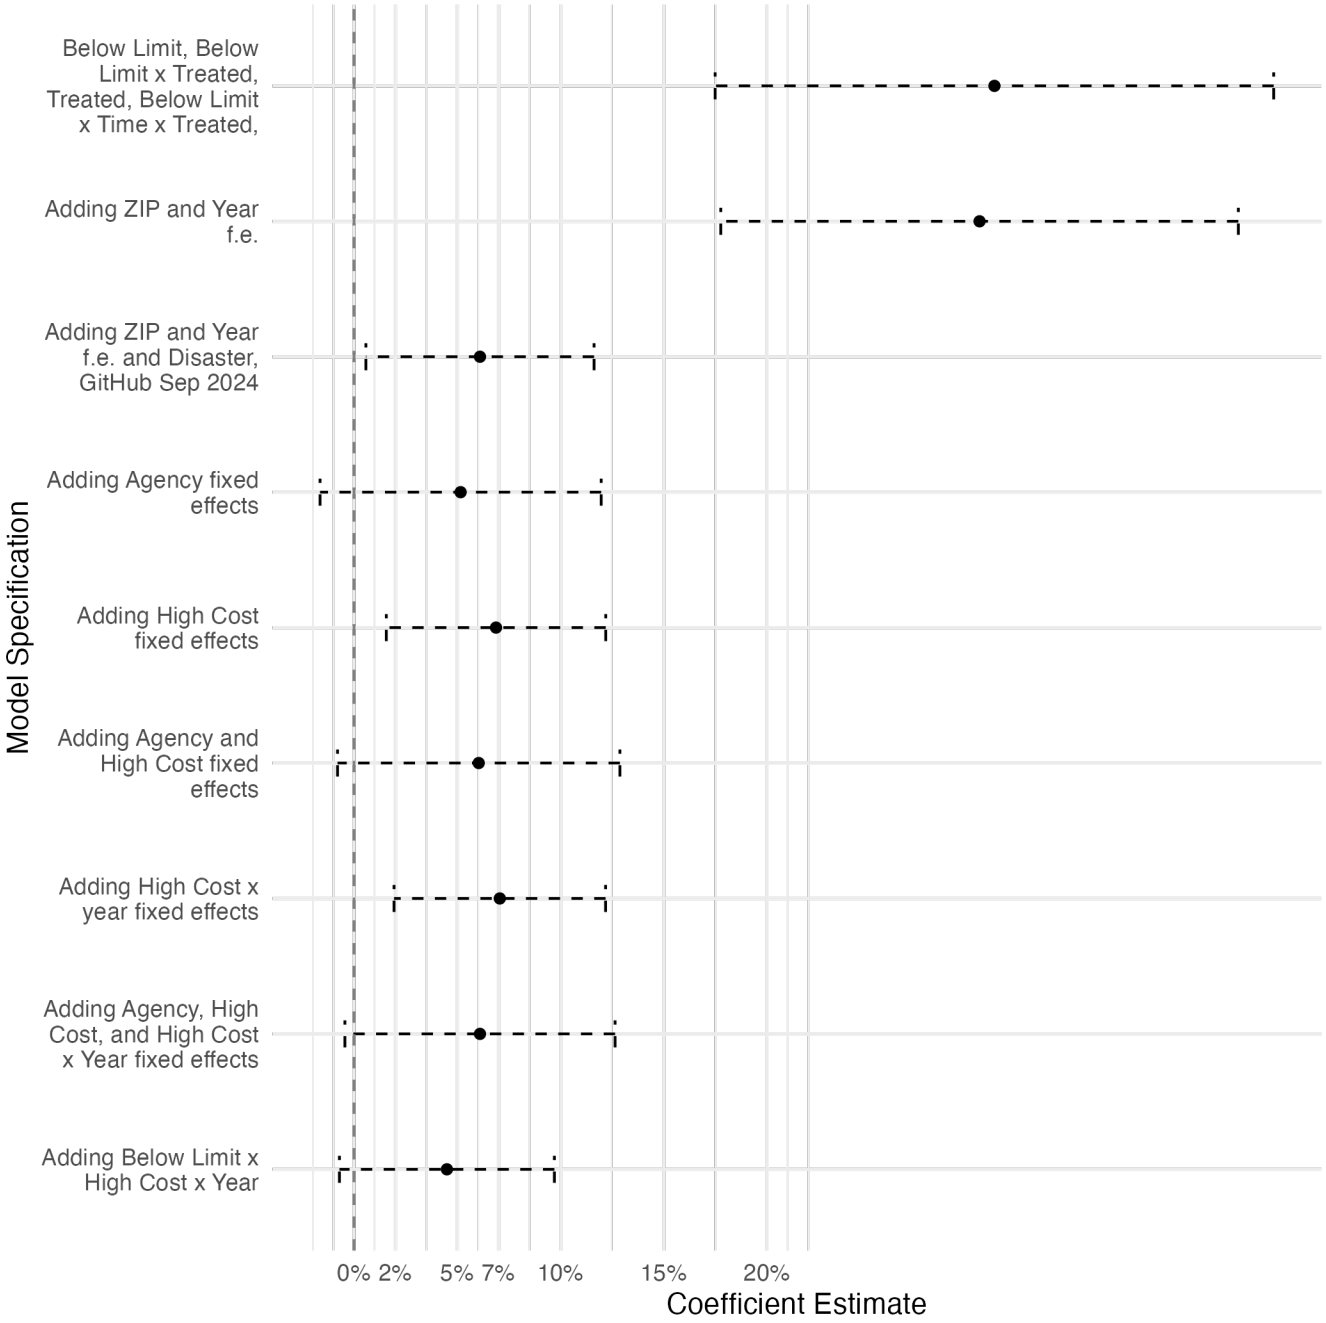

Figure A10: Summary of Coefficient Estimates — Securitized cond. on Origination, Time +3, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

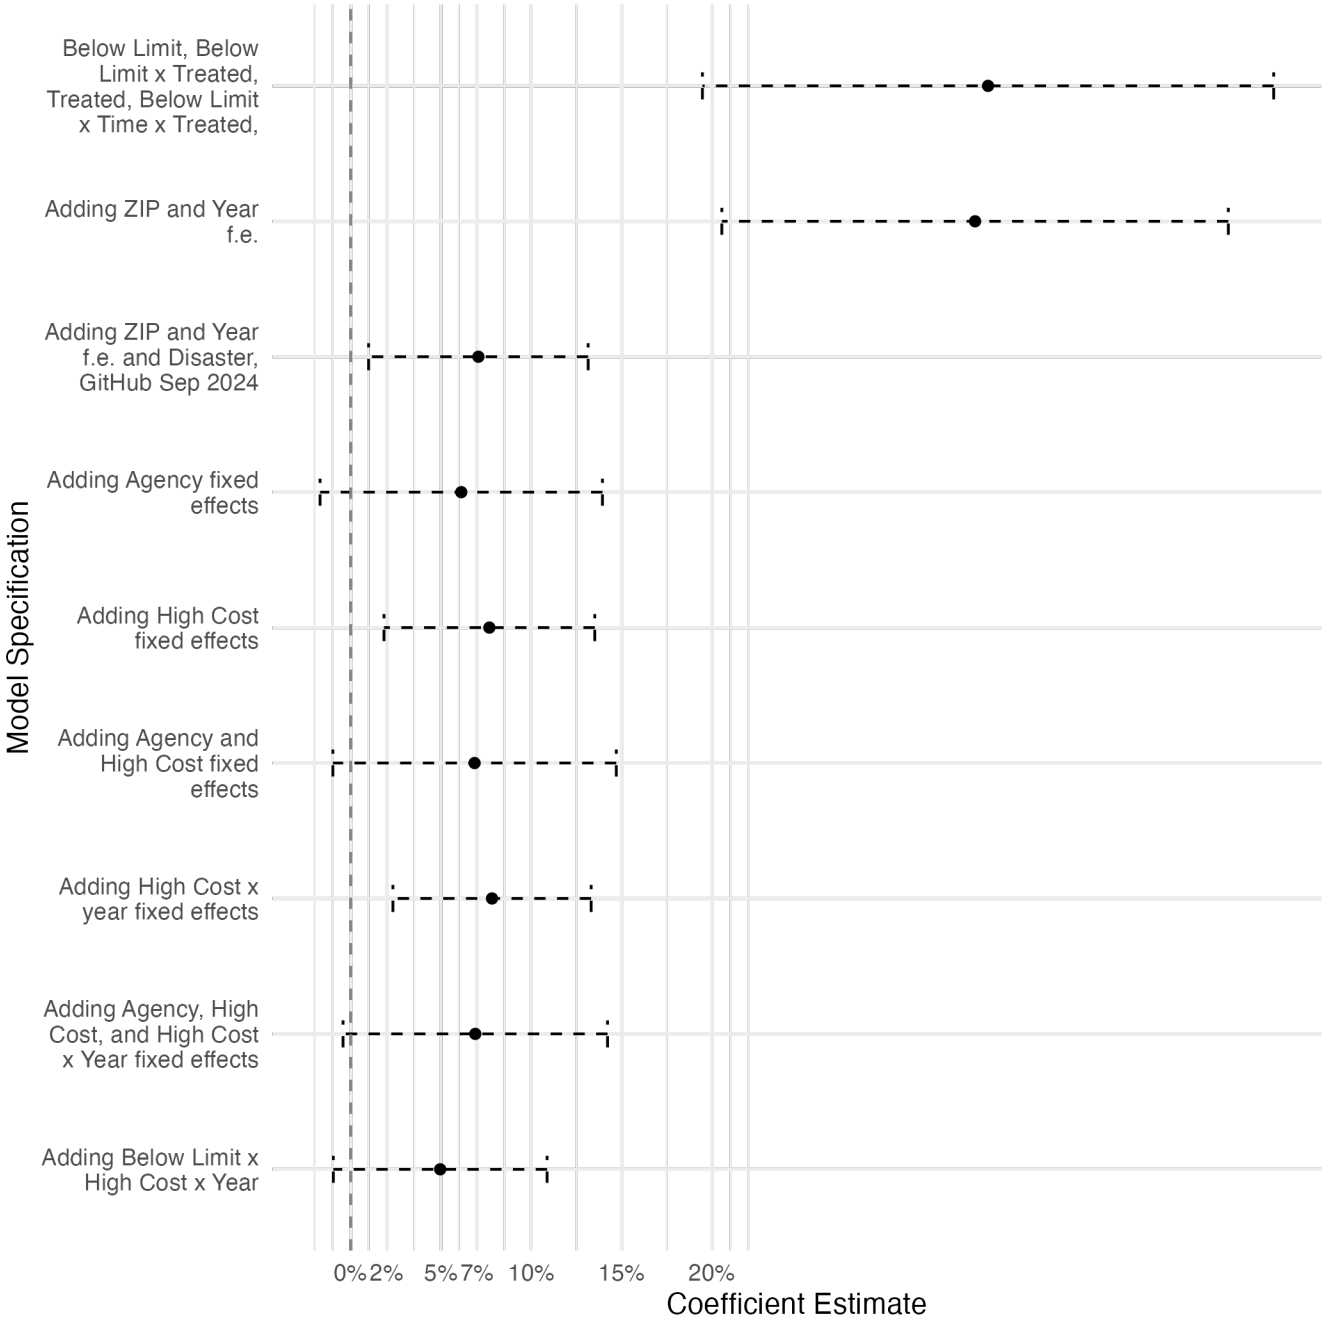

Figure A11: Summary of Coefficient Estimates — Securitized cond. on Origination, Time +4, Window ±5%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

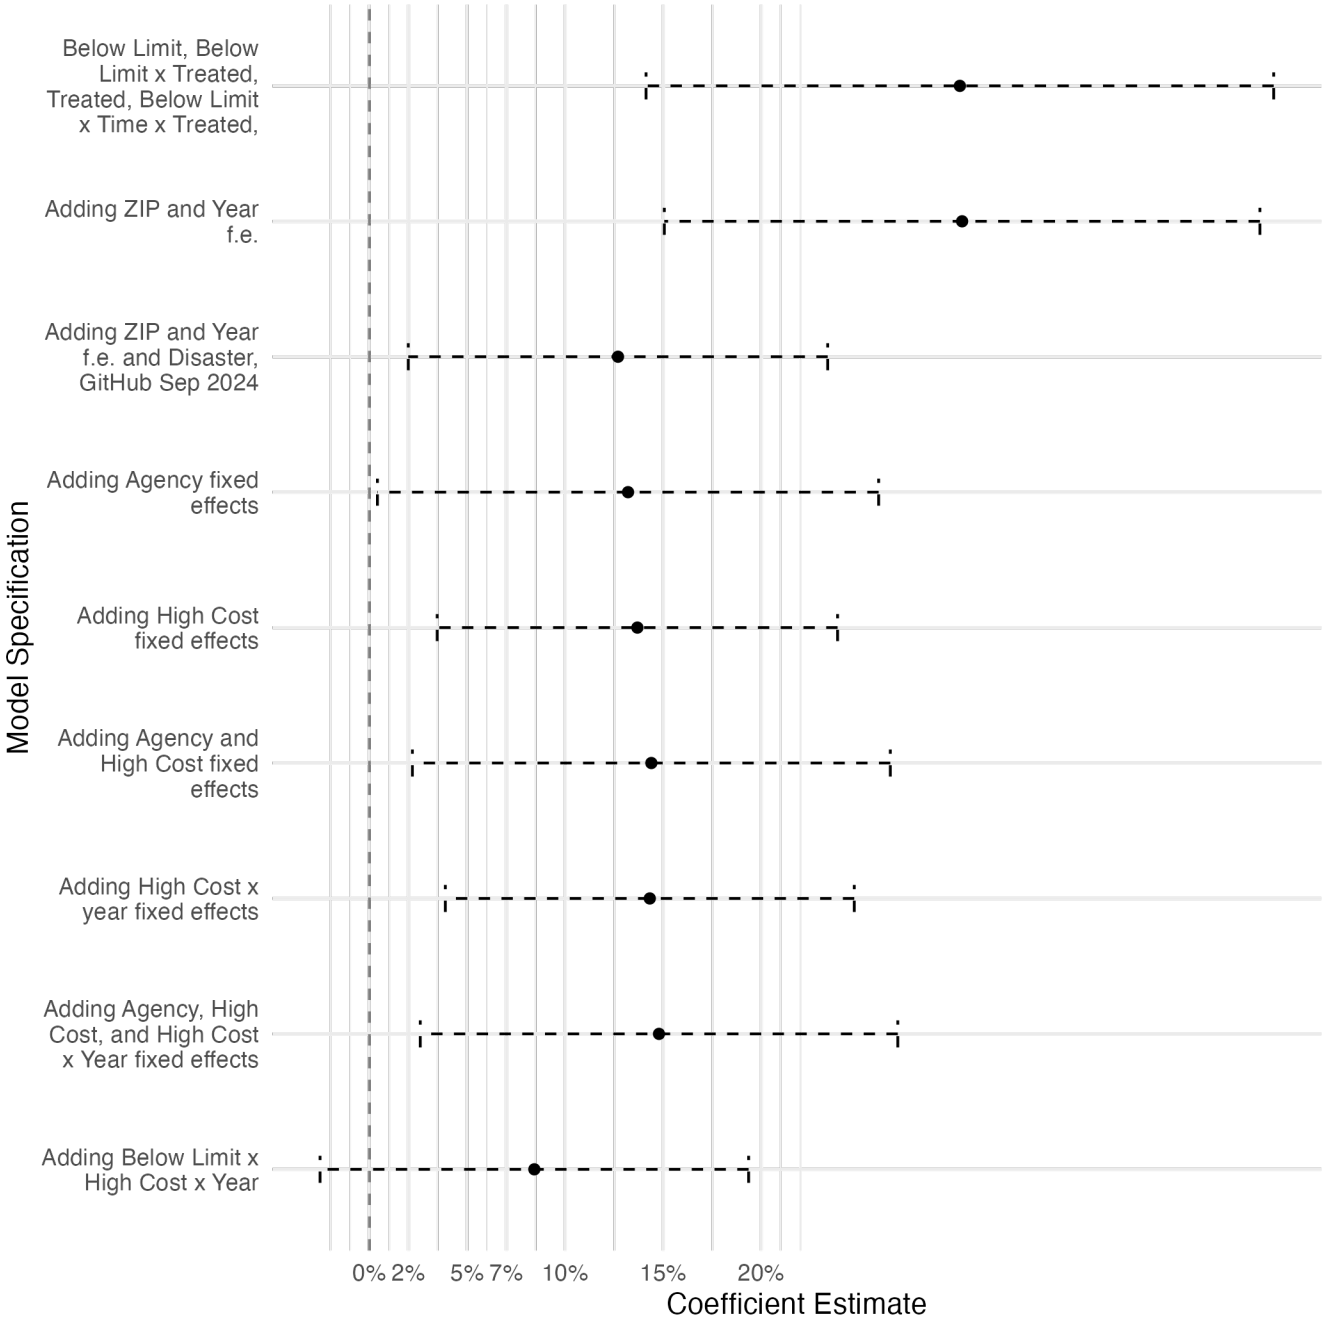

Figure A12: Summary of Coefficient Estimates — Securitized cond. on Origination, Time +4, Window ±3%

Reading: 0.1 is a +10 percentage point increase. 95% confidence intervals double-clustered at ZIP and year levels. Results match the Tables 1–14 presented next.

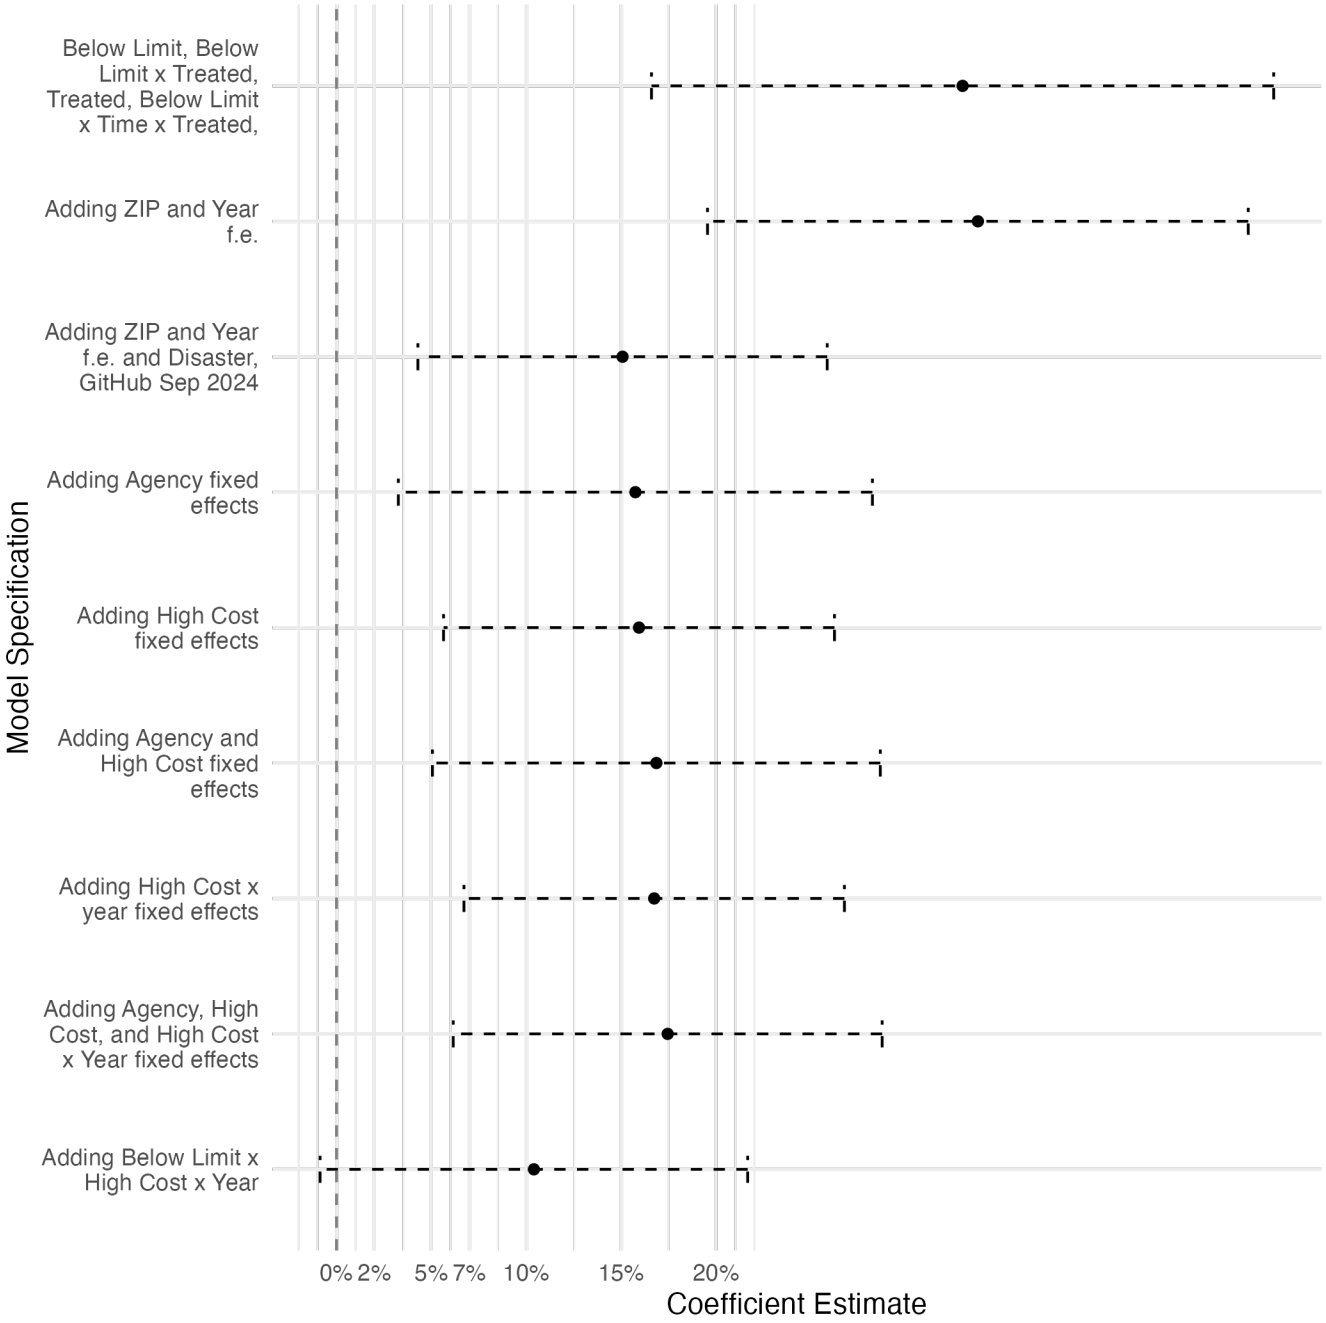

Table A1: Difference-in-Differences Results (first line of each Figure) — Windows of 20, 10, 5%

This regression has Treated, Below Limit x Treated, Below Limit, Time x Treated, Below Limit x Time x Treated. Standard errors double-clustered.
